

MOLECULE™

AS SEEN AT THE PERFORMANCE RACING INDUSTRY TRADE SHOW

BREAKTHROUGH TECHNOLOGY IMPROVES RACING SUIT SAFETY

Racing suits absorb fuels that can ignite during flash fires and cause serious injury.

But now breakthrough technology from Molecule Labs makes Nomex® and other technical fabrics virtually impervious to flammable liquids.

MOLECULE™ PROTECTOR creates a durable protective coating that helps your suit repel combustible spills and stains — and yet the fabric still breathes. Simply spray it on and tumble dry to boost your protection.

Improve the performance of your racing suit with Molecule™ Protector. Part of the Molecule™ Technical Fabric Care System.

Nomex® is a registered trademark of E.I. du Pont de Nemours and Company.
